I

2017 Ulju-gun Overseas Buyer Business Meeting

Summary of the Event

- Purpose : Promotion of business opportunities both buyers and SMEs(small medium enterprises) in Ulju-gun
- Date for the Event : June 30th , 2016 at 10:00 A.M ~ 17:00 P.M.
 - ※ Event Period : June, 29th(Tue.) ~ July, 2nd (Sat.)
- Place : 2nd, Ulsan Business Center in Ulju
- Inviting Buyers : 4countries, 22companies
- The number of participating the SMEs : 49companies
- The fields of Business Meeting : Shipbuilding, On/Off Plant, Auto part, Environment related
- Major contents : 1:1 business meeting; welcome dinner; Tour of local industrial facilities, etc

Main schedule

Date	Time	Major contents	Note
6.29.(Wed.)	-	Entrance to Korea	
6.30.(Thur.)	10:00~17:00	Business Meeting	
	18:30~20:30	Welcoming Dinner	
7. 1.(Fri.)	10:00~17:00	Tour & visit of major places	
7. 2.(Sat.)	-	Leave Korea	

※ Visit : Hyundai Heavy Industry Co., Ltd.

ALPHA TECHWIN CO., LTD

Representative	Park Ok-sil	Business Type	Manufacturing / Pressure Vessel etc.
Address	81, Cheoyongsaneop 1-gil, Onsan-eup, Ulju-gun, Ulsan		
Sales Amount	5,000,000,000 KRW	Homepage	www.alphatw.com
Phone Number	+82-52-265-3686	Fax	+82-52-265-1984
Person in Charge	Park Myeong-seok	E-mail	pms@alphatw.com
Main Products	Plant for production of fertilizer through the recycling of organic waste; recycled fertilizer		

<Company Introduction>

Established in 2007, we engage in the production of environmental facilities and development of environmentally-friendly technologies.

We specialize in environmentally-friendly treatment of food waste and organic waste including dairy/fish/clam waste and production of land reclamation materials like fertilizer with recycled byproducts. We have developed technologies fit for environmentally-friendly treatment of household waste water and organic sludge for chemical production facilities instead of dumping them into the sea.

<Product Images>

<Product Description>

- * Production of waste treatment plant using our own technology
- * Provision of technology for operation of waste treatment plant and for waste treatment
- * Provision of technology for environmentally-friendly treatment of waste and for recycling based on resource circulation
- * Supply of fertilizer made with recycled byproducts

Chang Shin International Co., Ltd

Representative	Lee Chae-gu	Business Type	Manufacturing / Construction Equipment
Address	32, Cheoyongsaneop 3-gil, Onsan-eup, Ulju-gun, Ulsan		
Sales Amount	2,500,000,000 KRW	Homepage	www.okcsi.com
Phone Number	+82-52-239-3878	Fax	+82-52-237-0358
Person in Charge	Kang Tae-hyeon	E-mail	csi@okcsi.com
Main Products	DTH Hammer, Button Bit, Drilling Equipment, etc.		

<Company Introduction>

Established in 1993, we specialize in DTH (Down The Hole) Products. We will strive to help customer businesses enhance their productivity and competitiveness by good-quality goods with reasonable prices based on our advanced technology in drilling/boring sector

<Product Images>

<Product Description>

DTH (Down The Hole) hammer is cylinder-shaped pneumatic equipment used in drilling work. Its top is connected to the drilling equipment, and its bottom connected to the bit. Using compressed air, it makes piston motions and conveys the energy to the bit to make a hold in rocks with a Bit that has Tungsten Insert. It is used to drill holes in the H beam of building foundation, subway and bridges and more also used in development of underground water and hot springs. Some public companies in Northern Europe use hammers or bits to take advantage of geothermal heat.

CHEONG GU TECH Co., Ltd

Representative	Ha Sang-sun	Business Type	Manufacturing / Industrial vacuum cleaners
Address	404-5, Gunggeunjeong-ri, Sangbuk-myeon, Ulju-gun, Ulsan		
Sales Amount/ No. of Employee	2,000,000,000 KRW	Homepage	www.1009tech.co.kr
Phone Number	+82-52-273-1009	Fax	+82-52-265-4947
Person in Charge/Position	Ha Gi-yong	E-mail	1009tech@hanmail.net
Main Products	Industrial vacuum cleaners; cooling clothes		

<Company Introduction>

Established in 1989 and incorporated in 2014, we supply compressed air-operated vacuum cleaners and cooling clothes to shipbuilders.

<Product Images>

<Product Description>

- Compressed air-operated vacuum cleaners:
These are used to remove rainwater contained in blocks in the course of shipbuilding. They have no driving gears and thus are rarely out of order.
- Cooling clothes:
 - They enhance productivity by providing pleasant working environment.
 - There are diverse options to choose from, depending on types of work.

COLORANT COREA Co., Ltd

Representative	Seo Hae-yeol	Business Type	Manufacturing / Processed pigment, dye, pigment
Address	26, Amnihabang-gil, Samdong-myeon, Ulju-gun, Ulsan		
Sales Amount	3,300,000,000 KRW	Homepage	m.cccworld.co.kr
Phone Number	+82-52-262-6650	Fax	+82-52-262-6654
Person in Charge	Jo Hyeon-seok	E-mail	ccctop@naver.com

Main Products

- Fine Chemical
- Water Dispersion
- Complex Metal Oxide Pigments
- Chromium & Lead Free Pigments

<Company Introduction>

We specialize in environmentally-friendly functional paints and pigments and strive to supply good-quality goods to meet customer needs based on our management philosophy of respect for mankind and customer satisfaction.

- * Our mottoes are challenging spirit, creativity, and earnestness.
- * All our employees strive for self-development with concerted efforts.
- * We are a first-rate business with the "can-do" spirit.

As a social business valuing the environment and people, we will do our best to supply light, clear, and diverse colors of pigments and paints to the global village.

[ISO 9001:2008, ISO 14001:2004]

<Product Images>

<Product Description>

Category	Characteristics and usage
Water Dispersion Pigment	Composed of good-quality wetting/dispersing agents, they are toner goods featuring high color immersion power. They are easily mixed with water media. They are used as Emulsion, Water Paint, Paper & Textics Coating, stain, and colorant.
Chromium & Lead free Pigments	They can replace inorganic pigments containing lead/cadmium compounds. They are environmentally-friendly pigments used in variety of applications like toys, stationery, artificial teeth, vehicle, ink, and paints.
Complex Metal Oxide Pigments	They are very stable, environmentally-friendly pigments made from metal oxides through high temperature firing. They are highly heat/weather-resistant and used widely in paints and engineering plastics.
Aluminum Paste Pigments	They feature silver-white luster as metal pigments made by wetting aluminum powder into organic solvent. They are excellent in hiding power, anti-rusting power, and heat reflection. They are widely used in paints (for ships, tanks, and steel structures), printing ink, textile, and plastics.

DECCO LIMITED

Representative	Lee Dong-jun	Business Type	Construction / Plant
Address	76, Gwangcheong-ro, Ungchon-myeon, Ulju-gun, Ulsan		
Sales Amount	10,000,000,000 KRW	Homepage	www.decco.co.kr
Phone Number	+82-52-225-0330	Fax	+82-52-225-0348
Person in Charge	Kim Ung-su	E-mail	wskim@decco.co.kr
Main Products	Ship engine repair; power plant construction		

<Company Introduction>

Established in 1989, Decco Limited started with ship repair and crank shaft production and processing. We have expanded to power plant construction and O&M (Operation & Maintenance) service and have successfully completed the work for construction of power plants and their commissioning in Panama, Haiti, Iraq, and Papua New Guinea. We have also secured the status as a first-rate business engaging in preventive maintenance work.

<Product Description>

This is a photo of Haiti E-Power 30MW Diesel Power Plant built by us. We carried out the EPC (engineering, procurement, construction) work for the plant.

DONGJOO WELDING Co., Ltd.

Representative	Jo Jae-yeong	Business Type	Manufacturing / Welding parts, welding automation equipment, industrial machinery
Address	11, Gatgol-gil, Ungchon-myeon, Ulju-gun, Ulsan		
Sales Amount	8,600,000,000 KRW	Homepage	www.djwelding.com
Phone Number	+82-52-256-4015	Fax	+82-52-256-4041
Person in Charge	Lee Jong-gak	E-mail	djweld2010@djwelding.com
Main Products	Welding parts, welding automation equipment, industrial machinery		

<Company Introduction>

Established in January 2000, we boast first-rate technological prowess in automated pipe welding equipment and a solid sales/marketing network and export to China, Japan, and the United States. We are enjoying the highest domestic market share in welding consumables. Our automated pipe welding equipment is used in many shipyards and jobsites.

<Product Images>

<Product Description>

- Automated welding equipment for large diameter pipes; It is activated without rail and helps workers to carry out welding work rapidly and well.
- The automated welding equipment is widely used for welding work in heavy and shipbuilding industries.

ELIMKOREA Co., Ltd.

Representative	Jang Yun-rak	Business Type	Manufacturing /Metal Structure
Address	1F, Heavy Industry Complex, 135, Cheoyongsaneop 3-gil, Cheongnyang-myeon, Ulju-gun, Ulsan		
Sales Amount	8,600,000,000 KRW	Homepage	www.elimkorea.kr
Phone Number	+82-70-7836-4998	FAX	+82-52-232-8845
Person in Charge	Kim Jeong-mi	E-mail	jamie.kim@elimkorea.kr
Main Product	Steel Structure / Tank, Shelf, Frame, Stand, etc		

<Company Introduction>

Established in 2009, we produce steel structure metal products used at the country's top-3 shipbuilders, using experienced employees who have accumulated knowhow for years. We boast sheer technological prowess and product stability. We can make any metal products used in ships to meet customers' requirements.

ENCORE NETWORKS Co., Ltd.

Representative	Jang Sangyong	Business Type	Manufacture/ Automobile Parts
Address	5, Teosil 2-gil, Onyang-eup, Ulju-gun, Ulsan		
Sales Amount	KRW 2 billion	Homepage	www.encorenetworks.co.kr
Phone Number	82-52-237-6120	Fax	82-52-237-4119
Person in Charge	Lee Gyuhwan	E-mail	guyhwan79@hotmail.com
Main Products	The process of recovering metal from wastewater		

<Company Introduction>

The company have been operating its business with excellent technologies in the industry of environment consultation since it was first established in 2009. Design and installation of contamination prevention systems for the environment since 2009. In 2011, the company succeeded in localizing and marketing sodium hydrogen sulfide (NaSH, 30%), which is a reducer in the nonferrous metal refinery processes. In 2012, the company developed processes for recovering metals (Zn, Cu, Ni and Pb) from industrial wastewater.

<Product Images>

The metal recovery process
(including water tank, reactor, settling tank, Dehydrator)

sodium hydrogen sulfide 30%

<Product description>

- Selective reaction with metal ion for forming sedimentation in form of sulfide
- Small volume of chemicals is required, and settled metal is recyclable.
- The chemical properties of various metals vary in ionization levels and these properties are used for adjusting the oxidation reduction potential (ORP) and acidity (pH) to selectively settle and recover metal ions.

ENTRA Co., Ltd

Representative	Jae-Hee Park	Business Type	Manufacturer
Address	1212-1, Joil-ri, Samdong-myeon, Ulju-gun, Ulsan, Korea		
Sales Amount	7,300,000,000 KRW	Homepage	www.dsht95.com www.entra.asia
Phone Number	+82-52-254-1934	Fax	+82-52-254-1938
Person in Charge	Kim Ji-Won	E-mail	jwkim@dsht95.com
Main Products	Wheel cleaner, disease preventer etc.		

<Introduction of Company>

ENTRA Co., Ltd., which pursues the philosophy of “Human Dignity” and “Customer satisfaction”, has secured a system to mass-produce truck wheel washers thanks to the concern and support shown by its customers. On the basis of this system, the company is doing its best to help its customers reduce their production cost and construction periods.

Staffed by the best quality professionals and equipped with a quality guarantee system based on ISO 9001, ISO 14001 certification, ENTRA Co., Ltd will assume full responsibility for the products released from the company

<Product photos>

<Description of product photos>

- (1) Wheel cleaner: Wheel cleaner is a machine that cleans wheels and the understructure of vehicles accessing construction site, mine, cement plant, and sites of lumbering, quarrying and waste disposal where airborne dust and pollutants exist. The system prevents airborne dust, leakage of earth and sand, and damage of paved roads. The system is fully automated and requires no labor. The product cleans the underbody, sides and inner/outer sides of wheels of vehicle fast and effectively for a cost savings to customers in terms of labor as well as a reduction of the construction period.
- (2) Disease preventer : The company is currently under development of a disease preventer based on the operating principle of the wheel cleaner to automatically spray chemicals on passing vehicles to prevent intrusion of bacteria. It is expected to be completed in July 2012.

GH TECH

Representative	Kim Hyeong-ho	Business Type	Manufacturing/Shipbuilding Material
Address	485, Daebok-ri, Ungchon-myeon, Ulju-gun, Ulsan		
Sales Amount	(As of 2015) 3,800,000,000	Homepage	-
Phone Number	+82-52-269-7010	Fax	+82-52-269-7020
Person in Charge	Kim Hyeong-ho	E-mail	gaon1008@naver.com
Main Products	Shipbuilding Material, SUPPORT & SEAT		

<Company Introduction>

We produce shipbuilding-related PIPE SUPPORT & SEAT. We have obtained the following certifications: ABS, WPS, ISO9001 and do business with the below companies with regards to support seat.

1. Hyundai Heavy Ind - Cooperative firm
2. Hyundai Mipo - Cooperative firm,
3. Sungdong Shipbuilding - Cooperative firm

<Product Images> SUPPORT SEAT

<Product Description>

- Piping support
- Machinery seats

G-HOO Co., Ltd.

Representative	Jung Chiltae	Business Type	Building robot system, industrial robot installation, teaching/overhaul, paint/sealer supplying system
Address	4 Cheoyongsaneop-1gil, Onsan-eup, Ulju-gun, Ulsan, Korea		
Sales Amount	500,000,000 KRW	Home Page	www.ghoo.co.kr
Phone Number	+82-52-289-8727	Fax	+82-52-289-8725
Person in charge	Shin Gyuhyun	E-mail	ghoo@ghoo.co.kr
Main Products	Robot teaching, painting systems, and sealing systems		

<Company Introduction>

G-Hoo Co., Ltd. specializes in industrial robots, automatic printing equipment, and sealing systems, and its technology and product reliability are recognized not only in Korea but also in many foreign countries, contributing to the automobile industry as well as to other general industries. Having its own research center and training institute, it concentrates on honing skilled workers and building technological knowledge.

Haeweon Industry Co., Ltd.

Representative	Lee Yong-jae	Business Type	Environmental facilities
Address	51-5, Cheoyongsaneop-ro, Onsan-eup, Ulju-gun, Ulsan		
Sales Amount	KRW 25 billion	Homepage	www.haeweon.net
Phone Number	+82-52-222-8421	Fax	+82-52-222-8410
Person in Charge	Kim Ho-cheol	E-mail	hckim870@naver.com
Main Products	Environmentally-friendly industrial plants, such as incineration, waste/sewage treatment, water purification, dust collection facilities		

<Company Introduction>

Established in 1994, we have expanded our lines of business from mechanical facility works to the works associated with environmentally-friendly industrial plants, power plants, petrochemical plants, iron & steel works plant, etc. We now have seven licenses for mechanical facility works and water supply/sewage works and the like. We have adopted the ISO 9001 (quality management system) in an effort to secure high-end quality in what we are doing. We have secured differentiation from competitors in the works for environmentally-friendly industrial plants based on the sheer records of performance. Our engineers have accumulated capabilities for design, manufacturing, and onsite installation/commissioning of environmentally-friendly industrial plants.

<Product Images>

<Description of product photos>

○ Incineration systems : The types of incineration systems we supply include stoker-type, fluidized bed-type, and melting furnace-type. You should choose a type, according to the status of waste to be incinerated (e.g. ordinary household waste, industrial waste, sewage sludge, sludge from purified waste water, high-density waste liquid, toxic gas). Components of an incinerator system are: input facility, incinerator, facility for using extra-heat, and post-treatment facility. Emission gases are treated under the relevant laws.

○ Water purification plant/sewage treatment plant: We have established lot of records for production. Installation, and commissioning of large-sized water purification facilities and sewage treatment facilities. We are able to design relevant methods of treatment per the clients' needs.

Halla Incorporation (Halla INC)

Representative	Kim Dong-ho	Business Type	Manufacturing, Distribution / Automotive parts
Address	36, Pyeongnidaegae-ro, Eonyang-eup, Ulju-gun, Ulsan		
Sales Amount	10,000,000,000 KRW	Homepage	www.hallainc.com
Phone Number	+82-52-263-0909	Fax	+82-52-263-0905
Person in Charge	Kim Jae-u	E-mail	dhkim@hallainc.com
Main Products	Vehicle Air-Compressors, Radiators, Condensers, Fans		

<Company Introduction>

They can replace inorganic pigments containing lead/cadmium compounds. They are environmentally-friendly pigments used in variety of applications like toys, stationery, artificial teeth, vehicle, ink, and paints.

They are very stable, environmentally-friendly pigments made from metal oxides through high temperature firing. They are highly heat/weather-resistant and used widely in paints and engineering plastics.

We represent Hanon Systems and Doowon Climate Control, which supply goods (Air-Conditioning System, Compressor, Radiator, Condenser, Fan) to Hyundai Motor and Kia Motors, on an OEM basis. We supply OES goods to aftermarket. We currently supply air-conditioning systems, compressors, radiators, condensers and fans to Korean vehicles.

<Product Images>

<Product Description>

- **Air-Compressor:** Used for air conditioner coolant to lower in-vehicle temperature
- **Radiator:** Used to lower engine temperature by circulating cooling water

HANDONG HYDRO Co., Ltd.

Representative	Jeong Seok-gwan	Business Type	Manufacturing, Whole Sale and Retail / Hydrogen Water Products
Address	56-5, Hoehak 3-gil, Onsan-eup, Ulju-gun, Ulsan		
Sales Amount	2,000,000,000 KRW	Homepage	www.handonghydro.com
Phone Number	+82-52-238-3388	Fax	+82-52-239-8630
Person in Charge	Jeong Cheol-u	E-mail	inokashira@hanmail.net
Main Products	Hydrogen Water Machine		

<Company Introduction>

Established in September 1st, 2013, we strive to enhance the quality of people's lives through hydrogen. Hydrogen has come to be recognized as an important material that helps prevent diseases. Many people have been awakened to the value of hydrogen water as a tonic.

We have developed five types of hydrogen water machines and are exporting them to Japan, where hydrogen water has become the focus of attention. We export to Japan using the OEM method and as well as our original products and these products are sold on TV home shopping, large supermarkets and duty-free shops.

Businesses in China, Europe, North America, and Southeast Asia have shown an interest in our products and thus we are discussing business opportunities with them while conducting sample tests.

We will continue to develop new products through technological advancement as those specializing in hydrogen water.

<Product Images>

<Product Description>

** H2 365 (Hydrogen Water Machine)

- Displaying strong reducing power, creating ample dissolved hydrogen (900-1,200ppb) and ORP -400mV in only two minutes.
- Use of high polymer electrolyte membrane, allowing use with any kind of drinking water including distilled water and reverse osmosis water purifier
- Immediately usable after simple attachment/detachment by water bottle-specific gender
- Thorough waterproofing (IPX8)
- Environmentally-friendly container (Eastman Tritan)

HANKOOK AUTOMATION Co., Ltd.

Representative	Seo Beom-su	Business Type	Manufacturing / Industrial Robot
Address	28, Wajigongdan-gil, Ungchon-myeon, Ulju-gun, Ulsan		
Sales Amount	4,000,000,000 KRW	Homepage	http://www.hkfasys.co.kr
Phone Number	82-52-222-2810	FAX	82-52-222-2812
Person in Charge	Seo Yeong-su	E-mail	hkfa@naver.com
Main Product	Factory automation facilities, Conveyor Line, industrial robot periphery facility, etc.		

<Company Introduction>

- ※ We specialize in factory automation and industrial robots. We have accumulated technologies and experience in relevant engineering, production, and installation.
 - We would like to work with businesses producing electronic goods and food in large quantities, logistics businesses, and businesses specializing in automated machinery.
 - We are interested in sharing our knowhow and experience with businesses that need to enhance their productivity, reduce the number of employees, and improve their working environment through changes in layout of production facilities.
 - We are ready to share our factory automation facility-related technologies with other businesses and cooperate with businesses engaging in import/export of parts.
- ※ We are looking for business partners that will work with us for distribution of factory automation facilities and consumables and exploration of markets with lots of potential.

Copper and copper alloy tubes and pipes produced by us boast excellence in thermal conductivity, anti-corrosiveness, and physical/mechanic property.

HANTEC TECHNOLOGY Co., Ltd.

Representative	Choi Deokyeol	Business Type	Manufacturer
Address	187 Goyeon-ri, Ungchon-myeon, Ulju-gun, Ulsan, Korea		
Sales Amount		Home Page	www.ihantec.com
Phone Number	82-52-270-3700	Fax	82-52-270-3790
Person in charge	Jun Hyeongseop	E-mail	harry@ihantec.com
Main Products	Oil fan, cap sealing and press components of automobile		

<Company Introduction>

HANTEC Technology, established in 1971, is an automobile component manufacturer with a history of more than 40 years. The annual revenue of the company was 70 billion KRW as of 2011 and its employees numbered 150. The major customers of the company include Hyundai Motors and KIA Motors in Korea, Chrysler in North America, and Mitsubishi in Japan. The company consistently participates in active marketing activities to increase the ratio of direct exports. The major products of the company include oil pans and cap sealing. The oil pan, developed by the technologies of HANTEC, is a synchronizing type of press system that improves throughput by approx. 8 times and contributes to cost saving.

The annual throughput of the cap sealing of the company is 60 million.

The company bears quality assurance certificates for ISO/TS 16949 and ISO 14001.

<Product Images>

NO. 1

NO. 2

<Product Description>

○ NO. 1 ~ NO 2. : The component is a container of lubricants supplied to all the parts of an engine and is positioned on the bottom of the engine.

The component consists of three parts of the body, the baffle plate and the drain plug. The baffle plate suppresses variations of lubricant surface during driving.

The drain plug acts as a passage to drain the lubricant during a lubricant exchange.

Main Product	Onshore/offshore pipeline Orbital Welding Equipment Industrial plant, marine Pipe Spool automated welding equipment (Rotator, Turning Roller, Manipulator etc.)		

<Company Introduction>

Founded in 2011, we specialize in the supply of automated welding equipment for pipes used in onshore/offshore, industrial plants, and marine sectors and provision of welding service in areas like GMAW, FCAW, and SAW. The use of our FCAW Orbital System helps businesses enhance their productivity about five times higher than the conventional welding method.

<Product Images>

<Product Description>

- Lineup of our products: Main controller, Remote pendant, Orbital Carriage, Guide ring (Rail), GMAW Welding Power source & Wire Feeder, Welding torch and Cables / Hoses
- Method of welding: Orbital carriage is installed on Guide ring placed next to the part of the pipe to be welded. Upon the start of welding, main controller provides the welding program data stored fit for the angle of the carriage, making it possible to go ahead with automated welding. In order to guarantee best welding conditions that correspond to the changing groove type of the welded part during the welding process, the operator can use the remote pendant's manual operation feature to slightly modify the amount of data in the saved welding program.

Main Products	Health food and others		

<Product Description>

- PROBI 365: This is granulated health food containing cereal enzyme made of flax seed, rice embryo bud, lactic acid bacteria, ginseng, etc.
- PROBIFI Fermented Nucleic Acid: This is functional cereal processed health food made in the shape of powdered granules. It is made of embryo bud of rice, broiled flax seed, chia seed, licorice, powdered fermented milk, etc.
- CHEONMA CHEONGGIHWAN Pills: This is functional processed health food made of Gastrodia elata, rice embryo bud, chia see, chlorophyll, lactic acid fermented milk mixed with honey.

<Product Images>

<Company Introduction>

Founded in November 2014, we produce functional health food in consideration of conditions optimal for human bodies, using rice embryo bud, brown rice, flax seed, etc. Our health food containing cereal enzyme includes PROBI 365, PROBIFI Fermented Nucleic Acid, CHEONMA CHEONGGIHWAN Pills. We will continue to develop an array of functional food through R&D in order to begin export and pioneer new domestic sales routes.

JEIL CHEMICAL Co., Ltd.

Representative	Jong-il, Im	Business Type	Manufacture/
Address	Postal Code: 449-92 38-16, Hoehak 3-gil, Ulju-gun, Ulsan (Onsan-eup)

Person in Charge	Jin-Yeong Kim	E-mail	jykim@jeil.co
Main Products	Epoxy resin		

<Company Introduction>

The company develops and supplies precision chemical products mainly made of epoxy since 1991.

The major products of the company include common and UV adhesives, resin for electric/electronic components, and resin for civil engineering and construction.

Since its establishment 20 year earlier, the company has been operating R&D, customer management and efficient production processes in a consistent manner.

The target of the company is to supply best products and services with the best technologies in the marketplaces around the world.

<Product Images>

<Product Description>

- A product to be used as normal temperature and heat hardening adhesive product type for label coating for various heavy quality materials
- A adhesive product to be used for inorganic and organic materials bonding (ABS, metal, plastic, etc.) and production of electronic products (batteries, consumer electronic products, etc.)

Main Product	Ship-engine parts & power generation, other facility businesses, bolt, nut & fittings		

<Company Introduction>

Jungsan Enterprise was founded in 1988 as a venture enterprise on basis of production knowhow in mechanical element parts, focused on industrial bolts and nuts for about 10 years, stretching itself as parts venture enterprise in the heavy industry field while moving to the present Ulsan plant. Therein, we equip various items and a few LOT systems that can correspond to a variety of customer demands, and we produce and supply ship engine, bolt and nut for power generation engine, plate and each fitting, which are special parts and neck-ring for rolling iron-manufacturing facility, shaft and various parts of mechanical elements.

<Product Images>

<Description of product photos>

-Parts for ship engine :

Receiver / Turbo charger Part. * Exhaust Valve Stud & Hy'd Nut. * Cylinder Cover Stud.
Connecting-Rod Stud & Hy'd. Nut. * Main Bearing Stud.

-Parts for industrial equipment :

Elastic Screw(Turbo Charge). * Fitted Bolt. * Stud for Connecting Rod.
Stud for Piston Crown. *Coupling Bolt & Nut. * Main Bearing Stud. etc.

-Parts for power generation equipment:

Hex-Bolt / Stud Bolt & Nuts / Bolt 12PT / Flange.
Bush / Shaft / Sleeve / Expansion Stud Bolt & Nut

-Steel mill rolling roll parts :

Ring for back up Roll / Work Roll

-For other industrial equipment:

Square and Hex-Bolt and Screw / High Strength Structural Bolt / Hex. Flange Screw.
Eye bolt / Plug / Set Screw / Plain Washer / Locking Washer / Beveled Washer.
Dowel pin / Locking plate / Adjustable Bolt / Tap Stud & Slotted Nuts / Stud Body Bound

Main Products	Street pole, LED streetlight apparatus, LED tunnel light apparatus		

<Company Introduction>

Jooyoung Lighting Co., LTD., & Jooyoung Innotech is a company developing and producing high-efficiency light apparatus (streetlight, security light) / LED lighting equipment and manufacturing street poles (stainless steel).

To realize the national vision of "Low carbon & green growth" as the global measure for energy saving and greenhouse gas reduction and to create the best product, we are continuously making every effort on R&D.

Jooyoung Lighting Co., LTD., & Jooyoung Innotech will develop eco-friendly products to become a company that customers can trust based on customer satisfaction and trust.

<Product Images>

<Product description>

- **LED streetlight apparatus:** SMPS embedded/external, high efficiency of over 100lm/W/Dimming control system, application of module method for easy maintenance, integral light distribution lens to realize excellent road lighting
- **LED tunnel light apparatus:** High efficiency of over 110lm/W, CLIP type enables opening & closing without any tool for convenient maintenance, optimized light distribution design inside the tunnel
- **LED tunnel light apparatus:** Apparatus modularization of LED tunnel light for Korea Expressway Corporation to enable easy maintenance, compatible with the LED modules of other companies
- **LED tunnel light apparatus:** Light distribution design without dazzling to avoid sight disturbance on the part of the driver; applicable to the sign without separate band, light apparatus applicable to the basic part of underground roadway tunnels

Main Product	Ship steel accessories, CABLE TRAY, COAMING used in shipbuilding MANHOLE COVER		

<Company Introduction>

Established in 1992, we specialize in production of Ship steel accessories, CABLE TRAY, COAMING, and MANHOLE COVER. We supply about 6,500 tons of products to Hyundai Heavy Industries (HHI), Hyundai Mipo Dockyard, and Samsung Heavy Industries (SHI) every year. We export about 500 tons of steel bands and extension arms for utility poles to NASU and Tokyo Electric Power Company and steel accessories used in shipbuilding to IHI Marine United Inc.

<Product Images>

<Product Description>

- Cable Tray: Used to support insulated electric cables used for power distribution and communications in ships
- Cable Seat: Used to protect and fix equipment, lighting fixtures, and lamps
- Ship manhole cover: Watertight objects used for blocks and water tanks in ships
- Coaming: A raised frame with a hole made on the walls of a ship for passage of cable

Main Products	Anti corrosion neoprene coating pipe line for offshore and passive fire protecting rubber		

<Company Introduction>

Established in 2010, we specialize in marine rubber products and have manufactured neoprene coated anti-corrosion riser pipes used in offshore oil and gas fields or petroleum refinery complexes since 2012. Our major customers are Brunei Shell Petroleum and PETRONAS of Malaysia. We are striving to develop new products including those made with anti-bio-fouling coating and passive fire protecting coating.

<Product Images>

<Product Description>

- Most effective method of riser and oil and Gas platform corrosion protection especially in the highly corrosive splash zone
- Our Neoprene coating performance : Excellent corrosion and impact resistance, strong adhesion and free of pinhole, Excellent abrasion and extremely durable

Main Product	Industrial Porcelain Tile, Granite Tile, and interior design tiles		

<Company Introduction>

Established in 1966, we are a top-notch business specializing in porcelain exterior tile production. We are supplying our products to leading Korean construction businesses including their projects carried out in foreign countries. We are also producing interior design tiles in our factories in China on an OEM basis and supplying them to Korea and other countries. We also engage in the production of tiles based on customer-designated designs.

<Product Images>

<Product Description>

1. Industrial Porcelain Tiles

They withstand heavy weight and are resistant to chemical substances, change in temperature, and abrasion. They are widely used at industrial sites. Their moisture absorption rate being lower than 0.02%, they are not easily contaminated. They are easy to clean and thus fit for spaces that requires good hygiene.

2. Granite Tiles

Ours are good-quality exterior materials that maximize merits of natural stone, in addition to being durable. Coming in diverse sizes and colors, they are used to make nice looking spaces.

3. Interior design tiles

These tiles are produced in China on an OEM basis based on our knowhow accumulated over years. Their appearance follows updated trends. They are produced through a stringent quality inspection process.

Main Product	Injector Auto Pusher System, Combination Rapping Device, Metal Tapping Machine, Lance Sealer, Auto Spray System, Transfer & Feed Car, Slag Auto Cleaning System		

<Company Introduction>

Established in 1996, we strive to meet customers' needs, using automation systems developed by us based on mechatronics technology, in which hydraulic, pneumatic, and control and measurement engineering are integrated, at job sites, where productivity and working environment needs to be improved, and work should be carried out safely.

<Product Images>

<Product Description>

- Injector Auto Pusher System - A device used to push the injector into melting furnace
- Combination Rapping Device - a device used to enhance boiler efficiency by removing smoke and dust from the inside wall of the boiler
- Metal Tapping Machine -Hole Tapping/Blocking System for furnace metal spitting out
- Lance Sealer - A facility used in the TSL (Top Submerged Lance) process to block noxious gas entering the furnace through the lance entrance
- Auto Spray System - A facility that injects antirust liquid to prevent oxidization of zinc ingots
- Slag Auto Cleaning System - A facility used to suppress the process of solidification of slags occurring in the furnace slag channel and remove them promptly, using diverse forms of chisels

Main Product	Explosion proof LED work light, LED work light, solar street lamp, power bank		

<Company Introduction>

We are a hidden champion company that specializes in the production of precision control equipment, specifically developing ODM/OEM for Hyundai Heavy Industry's Electro Electric System Division. As a expert company equipped with a product development ability accumulated over a long period of time and knowhow on the verification of reliability regarding products, Mepsi would like to introduce our own brand that we have launched recently at the exhibition.

<Product Images>

<Product Description>

- Smart solar street light/security light

A product used for home exterior/interior lighting or street light in small scale villages at locations with limited electricity distribution such as developing countries or islands and isolated areas in Korea (real-time load control possible through built-in high performance microprocessor, built-in scene lighting edge).

- Explosion proof LED work light

Explosion proof work light used in special areas such as shipbuilding plant and petrochemical complexes that have the danger of explosion due to oil mist or other flammable substances. Acquired KCS Explosion Proof Certification.

- LED work light

Low electricity, high efficiency LED work light that is used at general work sites with less danger of explosion. Consumes less electricity than existing work lights, offering higher brightness.

- Power bank

High efficiency power supply with Lithium ion battery that is compact and lightweight

Main Product	Fire proofing material for emergency shutdown valve-actuator in refinery.		

<회사소개>

We are a manufacturer of Fireproofing products for emergency shutdown valve actuator. It is a mandatory requirement to install a Fireproofing for valve actuator in Oil & gas refinery.

The product we produced is to protect the valve, motor and instrument during the hydrocarbon fire.

Our products are tested under UL1709 hydrocarbon fire condition.

<제품사진>

<제품설명>

- FR Coating : Fire proofing products for electric and pneumatic actuator.
It consists of 15mm of intumescent epoxy material.
It designed the removable type and follows the actuator shape as suitable to actuator.
Light weight, easy to install, can be installed on existing actuator with excellent finishes.

NAQWA ECOTAP Co., Ltd

Representative	Kang Dong-myeong	Business Type	Manufacturing/ Portable water purifier
Address	78, Sangbang-ro, Samnam-myeon, Ulju-gun, Ulsan		
Sales Amount	5,000,000,000 KRW	Homepage	www.naqwaecotap.co.kr
Phone Number	+82-55-372-1256	Fax	+82-55-372-1257
Person in Charge	Kim Yun-gyeong	E-mail	julia@naqwaecotap.com
Main Products	Portable water purifier		

<Company Introduction>

We engage in the production and sale (including export) of world-class portable water purifiers through continued R&D and advanced technology. The superiority of our products have been proved in a series of tests carried out in Korea as well as many advanced countries. We are planning to make forays into water purification markets (both for industrial and for household purposes) worldwide.

<Product Images>

<Product Description>

Our core technology lies in track membrane cartridge, which is composed of a thin (10 micron) polymer membrane with hundreds of thousands of absorbing pores (0.2-0.4 in diameter, i.e. about a hundredth of the thickness of human hair) in 1cm².

Our products filter out 99.9% of bacteria (associated with cholera, vibrio, salmonella, etc.) and pollutants from potable water without affecting good ingredients like mineral.

With a purifying capacity of 20,000L, you no longer have to bring water during outdoor activities such as camping, hiking and fishing.

Our products are also recommendable for those taking part in military training or in areas threatened by water shortages as in Africa.

Person in Charge	Yoon Seongho	E-mail	dark267@saeanhitech.co.kr
Main Products	Environment analysis system (air and water quality)		

<Company Introduction>

The company, which was established in 2001, is an expert in producing and supplying environment analysis systems. The company has been producing air and water quality analysis systems for several years. In particular, the company has been recognized for its excellent and stable quality thanks to its development and production of tele-monitoring systems (TMS) for air and water quality.

The company possesses the technologies for TMS engineering design and analyzer integration.

<Product Images>

<Product Description>

- TMS: Abbreviation for “Tele-monitoring systems” The system remotely monitors contaminants from public facilities, and provides automatic measurement data for administrative purposes, such as billing for the discharge of contaminants. The system allows for the scientific management of the discharge of contaminants for proving the basic data that is required for establishing environment policies.

Main Products	Industrial parts, bolts/nuts for offshore/onshore construction, Petrochemical, Power, Oil & Gas, Industrial, FPSO		

<Company Introduction>

We have accumulated technological prowess over 20-plus years and engage in the production of bolts/nuts used in Heat Exchanger, Module, Cracker, Tower, Pressure, Vessel, H.R.S.G., etc.

We supply our products to projects carried out across the world through Korean EPC (engineering/procurement/construction) businesses. We strive to produce first-rate products, using an advanced system for the entire process of operation.

In 2000 and 2010, we obtained the EN/BS/ISO9002 & KSA9002 certification and the ISO9001:2008 certification, respectively, for more systematic and standardized quality management.

<Product Images>

<Product Description>

- STUD BOLT and HEX BOLT widely used to connect pressure parts
- U-BOLT: U-shaped bolt with screw on each end, widely used for supporting pipes

SAMJUNG E&E

Representative	Jeong Yeong-chan	Business Type	Manufacturing/ Windpower generator, etc.
Address	88-11, Chocheon-ri, Ulju-gun, Ulsan		
Sales Amount/ No. of Employee	350,000,000 / 2 persons	Homepage	
Phone Number	+82-70-4140-6775	Fax	+82-52-249-7770
Person in Charge/ Position	Jeong Yeong-chan /CEO	E-mail	samjung2n2@gmail.com
Main Products	Windpower generator; hybrid wind power-photovoltaic generator		

<Company Introduction>

Since beginning the business in March 2010, we have specialized in the production of windpower generators. We have supplied 5Kw-class generators to Denmark and locations in Jeju and Namhae, Korea. We have become the only one in the domestic industry to adopt CAE-based 3D modelling aerodynamic and structural analysis. Ours boast price competitiveness with the use of a minimized number of parts. We are concentrating on development of nature-environmentally goods.

<Product Images>

<Product Description>

Vertical-type wind power generators (capacity: 10Kw or lower) displaying competitive advantage over rivals in terms of design reliability and price

SEJIN HEAVY INDUSTRIES Co., Ltd.

Representative	Lee, Eui-Yeol	Business Type	Manufacture
Address	216-18, Dangwol-ro, Onsan-eup, Ulju-gun, Ulsan, Korea		
Sales Amount	453,318 (mil. KRW)	Homepage	www.sejinheavy.com
Phone Number	+82-52-240-8548	FAX	+82-52-239-7011
Person in Charge	Lee, Jae-Kwan	E-mail	leejk@sejinheavy.com
Main Product	Shipbuilding/Offshore Structures, Onshore Plant, Onshore Storage Tank, Modular Process package, Other Structural Products etc.		

<Company Introduction>

Since its establishment in 1999, Sejin Heavy Industries has been contributing its leading technology and production capability to the development of Korea's shipbuilding industry. Our main businesses include residential areas for vessels, various types of large blocks, LPG carrier tanks and other components for large ships. With unrivalled product competitiveness in the shipbuilding market, Sejin has been expediting business expansion into broader markets by diversifying our product portfolio including living quarter and topside modules, modular process packages and other engineered structures

<Product Images>

<Description of product photos>

Deckhouse: Residential area for crew

LPG Tank: LPG cargo tank for LPG carrier, available in Prismatic type, Bi-lobe type and Cylindrical types.

Upper Deck Unit: Placed on top of a vessel, extending the whole length from bow to stern

Living Quarter: Offshore structure that are planted on up of offshore facilities, They often contain a helipad, a water purifying system, a power generator, heaters, ventilators, air circulators, switchgears, communications devices, a main control room, experimental equipment, as well as resident and working areas for the crew.

Storage Tanks: Containers that hold liquids, compressed gases or mediums used for the short- or long-term storage of heat or cold. Storage tanks are available in many shapes; Pressure tanks (Spherical and Cylindrical), External/Internal floating tanks, Domed external floating roof tanks, Horizontal tanks, Fixed-roof tanks and Variable vapor space tanks.

Other steel structures: Includes modular pipe racks, modular process equipment packages, separation and dehydration skids, structural supports and components, and so on.

SEJIN INNO TECH Co., Ltd.

Representative	Yun Jong-guk	Business Type	Manufacturing / Automotive parts
Address	108, Modulehwaneop-ro, Buk-gu, Ulsan (Hyomun-dong)		
Sales Amount	8,000,000,000 KRW	Homepage	www.gsejin.com

Person in Charge	Kim Heung-jae	E-mail	khj7857@sejinintc.com
Main Products	Production of Heat Exchanger & Pressure Vessel (Charge Air Cooler, Lube & Water, Gas Cooler, Oil Unit)		

<Company Introduction>

We have engaged in the production of heat exchangers for ships since 2008 and expanded to heat exchangers and pressure vessels for industrial plants and Fin Type Air Cooler. We have made a long way in the development of technology and quality stabilization through maximization of heat transfer space of heat exchangers. We are confident that no rival in the industry can beat us in the technology associated with the production of heat exchangers both for ships and for industrial plants.

<Product Images>

<Product Description>

- Charge Air Cooler: A device used to upgrade engine output by cooling the air put into engine incineration cylinder
- Lube Oil Cooler: A device used to cool lub oil supplied to the parts lubricating running gears

SEWON INDUSTRY Co., Ltd.

Representative	Shin Gwangsus	Business Type	Manufacture/ Transportation Vehicles
Address	47-16, Goyeongongdan 1-gil, Ungchon-myeon, Ulju-gun, Ulsan, Korea		
Sales Amount	KRW 500 million	Homepage	www.hanatire.com

Main Products	Polyurethane tires for forklifts and industrial transportation vehicles, and polyurethane molding machines		

<Company Introduction>

The company has been manufacturing and supplying polyurethane tires for forklifts and industrial transportation vehicles since its establishment in 1993. The company is an export business that produces industrial polyurethane products, including polyurethane tires for power-driven forklifts, polyurethane tires for heavy loads, non-marking tires, and hybrid solid tires that were patented. The company has gained recognition for its quality products from customers around the world, including in Japan, Latin America, the Middle East, and Europe. The company is also capable of producing other types of polyurethane products with its systems and technologies.

<Product Images>

Polyurethane Hybrid Solid Tire

Reach Type Press-On Solid Tire

<Product description>

- **Hybrid solid tire:** This patented hybrid solid tire that was developed by the company has an extended life cycle. Its abrasion life cycle is four times longer than conventional rubber solid tires. This type of tire leaves no skid marks, and it does not produce carbon dust.
- **Polyurethane tire:** Polyurethane tires are used for power-driven forklifts and industrial transportation vehicles. They are also ideal for heavy loads. This product has excellent features such as water resistance, oil resistance, abrasion resistance, and heat resistance. This product is versatile and can be used with a variety of transportation devices.

SOOKOOK PRECISION INDUSTRY Co., Ltd.

Representative	Min Hyo-sik	Business Type	Manufacturing / Burner, Pressure vessel, Dust collection system
Address	82, Gwangcheong-ro, Ungchon-myeon, Ulju-gun, Ulsan		
Sales Amount	200,000,000	Homepage	www.sookookjg.com
Phone Number	82-52-222-2810	FAX	82-52-258-4413
Person in Charge	Seo Yeong-su	E-mail	hmhw
Main Product	Production and coating of steel pipes/shipbuilding devices and materials		

<Company Introduction>

Established in 2003, we started business with the production of burners for industrial water cooler/heater. Starting in 2009, we expanded lines of business to design and production of pressure vessel, heat exchanger, and dust collection system used in petrochemical plants. We always strive to enhance our technology and product quality, while making efforts to make customers satisfied.

<Product Images>

<Burner>

<Pressure Vessel>

<Dust Collection System>

<Description of product photos>

Burner: A device used to heat water or air, using gas or diesel as fuel

Pressure vessel: A container designed to hold gases or liquids at a pressure substantially different from the ambient pressure.

Dust collection system: Exhaust gas is made to go through this system to collect and get rid of dust.

SYSCO Co., Ltd

Representative	Kim Seok-yi	Business Type	Manufacturing / Distiller, Heat Exchanger, Gas Producer
Address	648, Cheoyong-ri, Onsan-eup, Ulju-gun, Ulsan		
Sales Amount	24,000,000,000	Homepage	www.syscorea.com
Phone Number	82-52-257-9080	Fax	82-52-257-9081
Person in Charge	Kwon Tae-won	E-mail	twkweon@syscorea.com
Main Products	HRSG boiler, Power generation BOP (Balance of Plant), chemical engineering machinery, STACK & GAS DUCT, etc.		

<Company Introduction>

Our main lines of business are HRSG boiler and other power generation equipment and devices. Operating a factory that consists of three buildings in Ulsan, we have maintained business relationships with many power generation equipment/material manufacturers. We have obtained the following certifications: ASME -"U", "PP", "S"; ISO 9001:2009, 14001:2009. In 2015, we received an exemplary export business award from the City of Ulsan.

All of our factories are situated near ports, making it easy to produce, transfer and export large equipment. Our factories are also well-equipped in terms of industry infrastructure, making us an export company of power generation equipment with both the relevant technology and convenience.

Currently, we strive to diversify core products and make forays into world markets based on our sheer technological prowess. We have established a local corporation in Sri Lanka in connection with the plan to expand power generation and new/renewable energy business in that part of the world. Sysco is marching forward to become the global leader in the energy industry sector.

<Product Images>

<Product Description>

- **HRSG** : Size : 27,250(L)*3,322(W)*4,422(H), Weight : 30 Modules(4,735.5ton)
 Material : C.S,T11, T22, T91, T92
 Scope : Harp & Module Assembly (Suspension, Piping) NDE Test
- **Chemical Process Equipment**: Size : 17,820(L)* 6,840(W)*11,330(H), Weight : 346.3 ton (2 Sets),
 Material : SN 516-65+S5, ASME Code : U / S / PP
- **BOP** : Evaporator : SB410,STB35 / ID4,560x11578L / 96.3TON
 Condenser : SUS304 / ID3,100x6966H / 51TON, Scope : Manufacturing, Leak Test, Installation

TAESUNG Co., Ltd.

Representative	Sun-tak Kwon	Business Type	Manufacturing of special lubricant and others
Address	38-3, Hoehak 3-gil, Onsan-eup, Ulju-gun, Ulsan		
Sales Amount	KRW 2.1 billion	Home Page	www.tscnc.co.kr
Phone Number	82-52-227-6471 to 4	Fax	82-52-227-6475
Person in Charge	Sun-tak Kwon	E-mail	kst5439@hanmail.net
Main Products	Paint removers, paint-killing agents, automatic supplier of grease, etc.		

<Company Introduction>

Founded in 1994, Taesung Co., Ltd. has been contributing to the economic development of the country by reducing costs and manufacturing alternative products for imported items in the special chemical industry through constant research and development of new products and localization of imported products while focusing on technological development on producing spray paint removers. The paint-killing agent, which is the company's main product, is a fine chemical essentially used for paint lines. The company also has an absolutely strong competitiveness in terms of its quality and production system because of its technological collaboration with Germany. It has been committed to prevent the increase of costs because of repainting or the disposal of defected painting work, which is often seen in the painting and coating process when treating machinery, electrical, and shipbuilding parts. It also focuses on recycling products in a more environmentally friendly way.

<Product Images>

<Product Description>

- Use: Automatic grease lubricator
- Operation mechanism: Delivering a set amount of lubricants over a set time period at a consistent speed by the pressure of nitrogen gas generated from electrochemical reaction when current flows in electrolytes. The nitrogen gas imposes as much pressure as that set by the switch on the piston and gets the charged lubricant flow at a regular speed. Then, the LED lamp indicates if it works.
- Area of application: Widely applicable to general industrial plants and companies with machineries
- Excellent technology: Possible calculation of a correct supply interval, various choices for the amount of supplying lubricant, adjustable amount even in the middle of operation, nonhazardous generated nitrogen gas, and maintenance of a stable amount of supply with the electrolysis method
- Applicable to sliding guides, slide bearings, drive chains, conveyor chains, conveying machineries, roller and ball bearings, various mechanical driving systems, pump fans, and other equipment
 - Aircraft, textile, pharmaceutical, food, and refrigeration systems
 - Cement, automobile, petrochemical, electronics, and electrical facilities
 - Steel, iron manufacturing, shipbuilding, and power plant facilities
 - Dangerous areas and machines with serious corrosion, etc.

TAESUNG ENVIRONMENT INSTITUTE

Representative	Yun Gi-yeol	Business Type	Manufacturing/ Deodorizer, Environmental Analysis
Address	56-20, Hoehak 3-gil, Onsan-eup, Ulju-gun, Ulsan		
Sales Amount	5,700,000,000	Homepage	www.ts-ei.com
Phone Number	+82-52-247-8691	Fax	+82-52-247-8698
Person in Charge/Position	Park Yeong-min	E-mail	shine@ts-ei.com
Main Products	Deodorizer; high polymer additive		

<Product Description>

We engage in production of highly functional deodorizers and high polymer additives; drawing up manuals for environmental engineering and site management of anti-stench facilities, and basic design for anti-air pollution facilities and anti-stench facilities. We strive to present a new paradigm in environmental engineering through establishment of an integrated stench management monitoring system based on follow-up analysis.

YK-INPRO Co., Ltd.

Representative	Kim Gibyoung	Business Type	Engineering and Project consulting, Supply materials and goods for marine facility and plant
Address	41, Wonbong-ro, Onsan-eup, Ulju-gun, Ulsan		
Annual Sales	-	Homepage	www.yk-inproenc.com
Tel	+82-52-232-0981	Fax	+82-52-232-0982
Responsible Staff	Jeong Dong-cheol	E-mail	dc.chung@yk-inproenc.com
Type of Product	Independent Consulting Service/ Project Management & Project Control Support small/middle size module, equipment package, pre-assembly of equipment, pressure vessel, heat exchanger fired heater, compressure skid, ship block, purifier unit etc.		

<Company Introduction>

INPRO provides independent project execution advice and assistance to world class companies planning to fabricate onshore/offshore oil and gas projects in Korea. If you are looking at Korea to build your project, then you probably already know its 3rd generation fabrication yards are the most efficient and advanced in the world.

INPRO's consultants learned the ropes of project performance in these yards and are among the most knowledgeable in the fabrication business. We typically have 20 to 30-year experience with major fabricators such as Hyundai Heavy Industries (HHI), Samsung Heavy Industries (SHI) and Daewoo Shipbuilding and Marine Engineering (DSME).

<Product Images>

<Description of Product Photos>

- Project contracting and execution strategies
- Bid package and proposal review i.e. scope of work, responsibility, compensation
- Technical/commercial proposal analysis and evaluation
- Project key schedule development
- Commercial negotiation support
- Current/future work load curves for the major fabrication yards
- Insights into key business developments in Korean Fabricator

YOUNGKWANG Co., Ltd.

Representative	ChulKoo Hur	Business Type	Manufacturing / metal cutting, machines, all other machine-tools etc
Address	#41 ,Wonbong-ro, Onsan-eup, Ulju-gun, Ulsan, Korea		
Sales Amount	\$2,300	Homepage	www.ykmc.com
Phone Number	82-52-240-2494	Fax	82-52-237-2376
Person in Charge	SungWoo Jang	E-mail	sungwoo.jang@ykmc.com
Main Products	Pressure Vessel, Heat Exchanger, Fired Heater, Skid, etc.		

<Company Introduction>

Since its inception in 1962, YOUNGKWANG has accomplished steady growth with continuous R&D and pioneer's spirit.

We have been putting forth our best efforts to impress our customers with the best technology and quality in the plant and shipbuilding industry in the background of our management philosophy-creating value for customers, human-oriented management and contributing to the nation and society, and corporate spirit of new technology, new materials and new idea.

Growing as a world-wide advanced company, YOUNGKWANG will become a global company by securing the best competitiveness through change, innovation, environment-friendly & quality management and continuous improvement activity for management in preparation of information and globalization.

<Product Images>

<Product Description>

○ SKID MODULE

A modular process skid is a process system contained within a frame that allows the process system to be easily transported. Individual skids can contain complete process systems and multiple process skids can be combined to create larger process systems or entire portable plants.

○ **FIRED HEATER** : Fired heater, used in boiler applications in chemical industries or for providing heat to chemical reactions for processes like cracking

○ **REFORMER** : Steam reforming is a method for producing hydrogen, carbon monoxide, or other useful products from hydrocarbon fuels such as natural gas. This is achieved in a processing device called a reformer which reacts steam at high temperature with the fossil fuel. The steam methane reformer is widely used in industry to make hydrogen

○ **FLARE STACK** ○ **COLUMN/TOWER** ○ **PRESSURE VESSEL** ○ **HEAT EXCHANGER**
